Buraaq Mining Services Successfully Delivers Aard 5.5 LHD To Burgersfort Mine Site

Johannesburg, South Africa – June 2026

Buraaq Mining Services is proud to announce the successful delivery of an **AARD 5.5 Load Haul Dumper (LHD)** to our valued client in Burgersfort, Limpopo, on **24 June 2026**.

This delivery marks another significant milestone in our commitment to providing reliable mining equipment solutions and exceptional customer service to the mining industry. The AARD 5.5 LHD is a robust and efficient underground loading machine designed to maximize productivity, safety, and operational performance in demanding mining environments.

Our dedicated team worked diligently to ensure the equipment was delivered safely, on schedule, and in full compliance with client requirements. This achievement reflects Buraaq Mining Services' ongoing dedication to operational excellence and building long-term partnerships with our clients.

We extend our appreciation to our client for their trust and confidence in our capabilities. We look forward to supporting the successful commissioning and operation of the machine in the days ahead.

**Together, we continue driving mining excellence
across South Africa.**
