

**Buraaq Mining Services Media release,
August 2026**

Buraaq Mining Services at the Women in Mining Indaba 2026

Johannesburg, South Africa – August 2026

Buraaq Mining Services was proud to participate in the **Women in Mining Indaba 2026**, held on **20–21 August 2026 at Emperors Palace, Johannesburg**, bringing together women, mining professionals, industry leaders and stakeholders to celebrate and advance the role of women across the mining sector.

The event provided an excellent platform for meaningful conversations, networking and knowledge sharing around the opportunities and challenges facing women in the mining industry.

Throughout the event, the **Buraaq Mining Services team** welcomed visitors at our stand and shared more about the company, our mining solutions and the important role that women play within our organisation and the broader mining industry.

Our team was particularly proud to have strong female representation at the event. Their presence reflected Buraaq Mining Services' commitment to recognising the valuable contribution women make across different areas of the mining value chain.

The Indaba also gave our team the opportunity to engage with other industry professionals, exchange ideas and learn from the experiences of women who are helping shape the future of mining.

For Buraaq Mining Services, supporting women in mining is about more than participation. It is about creating opportunities, encouraging skills development, recognising talent and building an industry where women can continue to grow, lead and make a meaningful impact.

We would like to thank everyone who visited the Buraaq Mining Services stand, engaged with our team and contributed to the conversations during the event.

Buraaq Mining Services – committed to building a stronger, more inclusive and sustainable future for mining.
